Roger,

Sounds good, and I'm going to check in with Rick next week. I just want him to know that I'm on a workshare with OECA, and one of the projects is PFAS activities. Just in case, we have another fire drill in the next few months, I want him to know ahead of time that I might need some info. Thanks, Garth

Garth. Attached are three summary write-ups for the sites I deal with. Let me know if you need additional information. Rick, who is out of the office this week, has access to and is familiar with the various tracking systems. He should be back Monday.

Hey, no rush, and we can talk tomorrow or later this week. I'm just trying to get ready for the next fire drill, not the current one. Maybe you could ask Rick Rogers about what exactly I should do if OECA asks me next month to run something down on a couple of PFAS sites that may or may not be in Region 3. This time it was one in region 3 and one in region 5, but you get the gist of it right.

I also have had difficulties accessing some of the data bases. I will look into the matter further tomorrow morning. I have to catch a train now - talk to you tomorrow.

Roger,

I would like to see a fact sheet on Washington Works, but here's my broader question. OECA doesn't seem to know how to get on to that data base & search for info on it. It seems like they start from scratch with each PFAS fire drill. Do you know what I mean by that?

Garth,

There are at least two or three PFAS databases which includes general information about each of the relevant sites. I believe OECA has access to these. I'm not sure if you would need access approval or not. Let me check with a few people who may know and I'll get back to you. Do you still want a fact sheet on the Washington Works facility? I'll make a note to send one to you tomorrow.

Subject: Access to the big Office of Water Data base on PFAS?

Roger,

Can I somehow get access to the Office of Water database on PFAS issues? The reason I'm asking is that I'm working on a workshare with OECA folks, who sometimes need help (like say a fact sheet or site info) on a particular site. Can I go on to it or do you have to have special permission?
